BASIN DRIVE DRAINAGE PROJECT

PROJECT WILL TAKE THREE MONTHS TO COMPLETE

The Town is continuing its ongoing efforts to upgrade stormwater drainage in the community. Construction crews with State Contracting began a drainage improvement project on Basin Drive on Aug. 31st.

Drainage will be upgraded between Seagrape Drive and West Tradewinds Avenue. Work started in front of the marina and will move west along the roadway.

There will be temporary detours and road closures during the three-month project, but only local traffic will be impacted to any great degree. After the new drainage is installed, the road will be milled and resurfaced.

Please exercise caution while driving or walking through this area.
